### **SSMC Connectors offer 12.4 Ghz performance in a micromini package**

Wake Forest, North Carolina – July 13, 2009 – BTC is a Delta Electronics authorized distributor for their new SSMC microminiature, 50 $\Omega$  impedance connectors with 6-40 threaded coupling. SSMC connectors are ideal for use in limited-space applications that require the rugged design of a threaded coupling interface. They are best suited for use with semi-rigid cables or miniature flexible cables in demanding applications up to 12.4 Ghz. BTC stocks an extensive line of receptacles with a variety of mounting configurations and contact / insulator terminations for any packaging requirements. We also offer in-series and between series adapters including a slide-on version of the SSMC interface that reduces wear and tear on mounted connectors and saves time mating and unmating test cables. SSMC connectors are designed in accordance with IEC 169-20, and are intermateable with other SSMC connectors.

### **About BTC Electronic Components**

BTC Electronic Components, Inc. is an ISO9001:2000 certified value-added assembly distributor of connectors, connector accessories, and heat shrink products. BTC can provide custom assembly, modification of standard components, customized packaging solutions, technical support to engineers, application specific design as well as standard value-added services including: just-in-time delivery, bar coding and EDI. For more information on BTC Electronic Components, please visit the web site at <http://www.btcelectronics.com>.
